Range of application

The **Life Cycle Assessment (LCA)** was carried out according to /ISO 14040/ seq. following the requirements of the IBU guideline for type III declarations. The data reference consisted of specific data provided by GUT member companies and of data from the “GaBi 4” database. Specific product data for this declaration originate from InterfaceFLOR (the manufacturer) and its suppliers

The life cycle assessment covers

- Part 1: Production stage including the supply chains (from cradle to factory gate)
- Part 2: Delivery/installation, use
- Part 3: End-of-life stage

Scope of the life cycle assessment
